

# DECORATION.

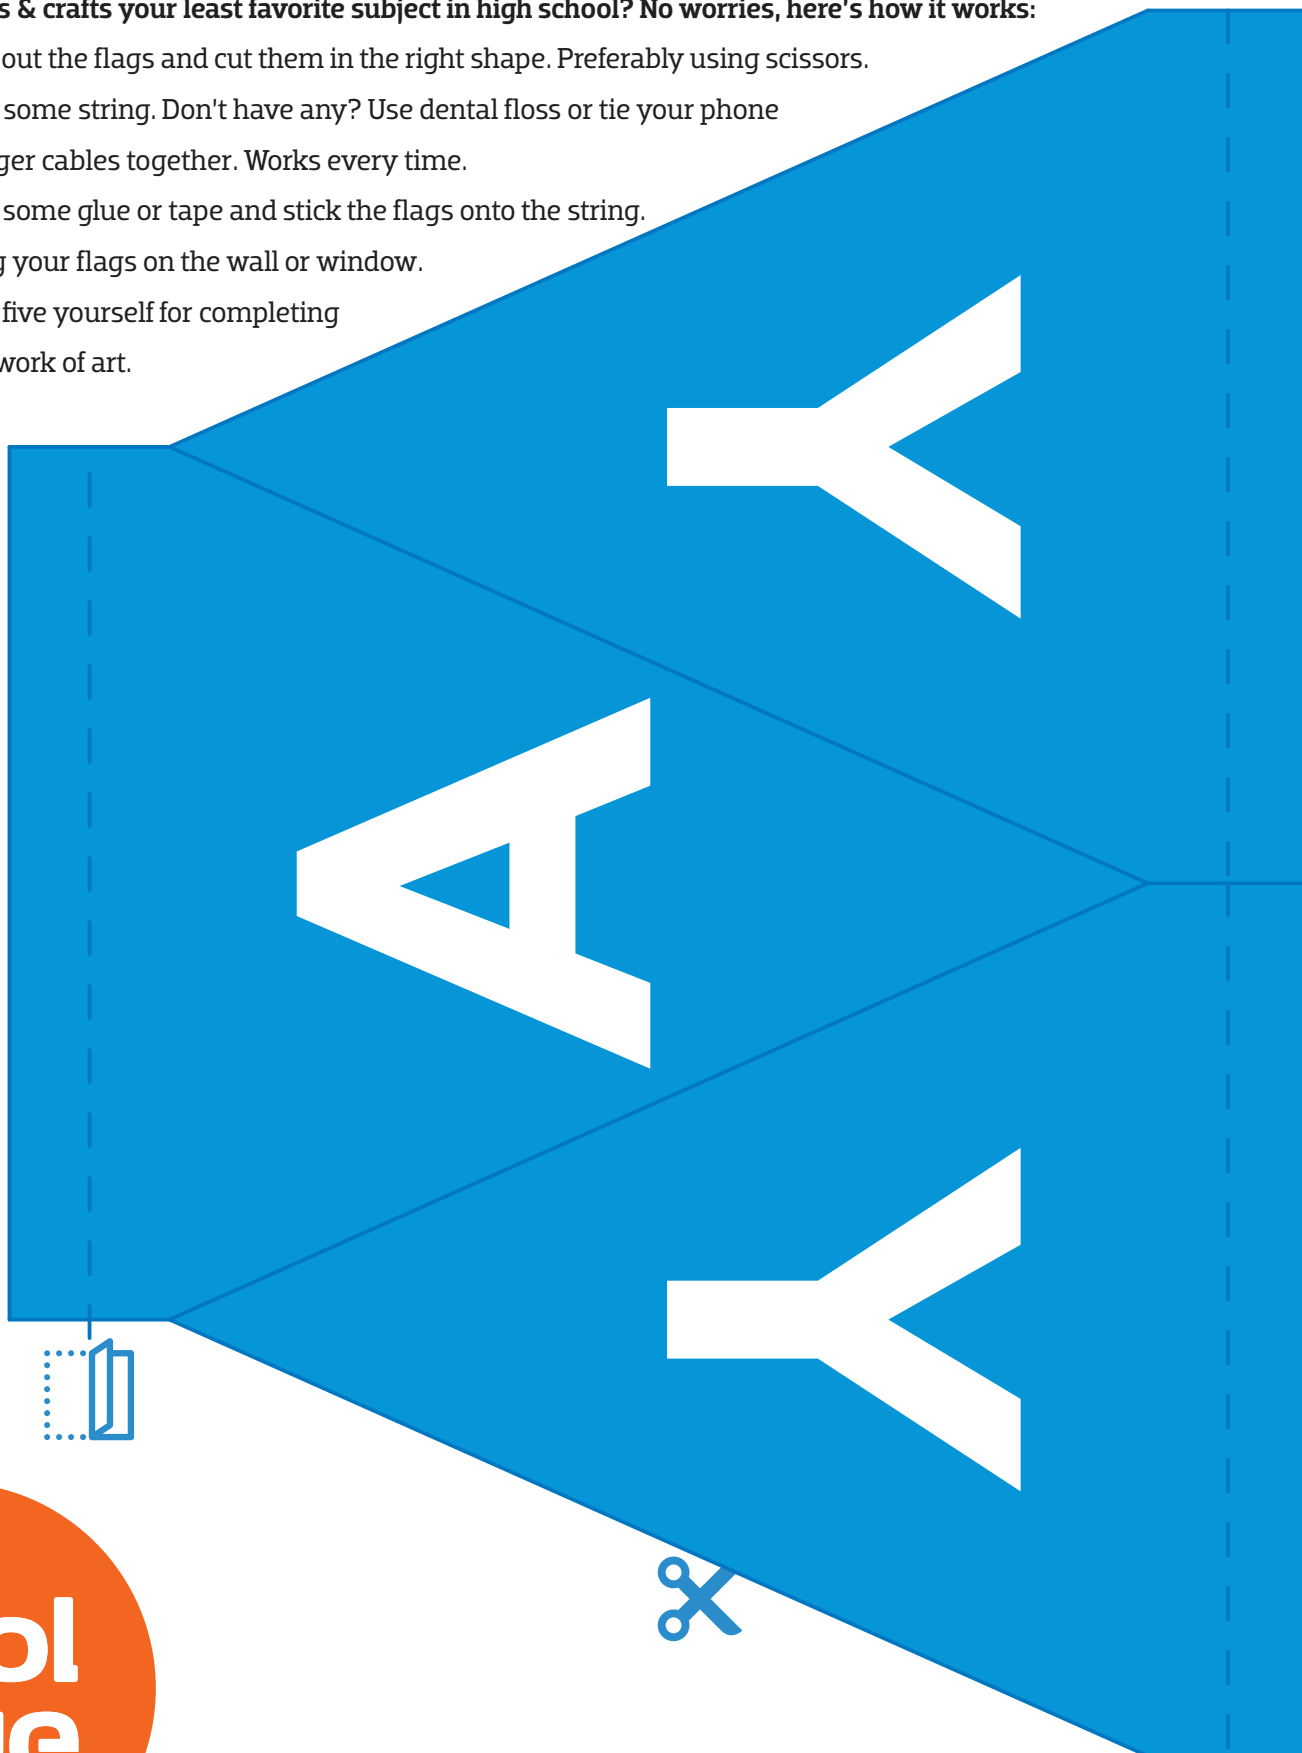

## Just hanging out.

Here it is. Your very own banner. Grab your scissors and knock yourself out. Not literally, of course.

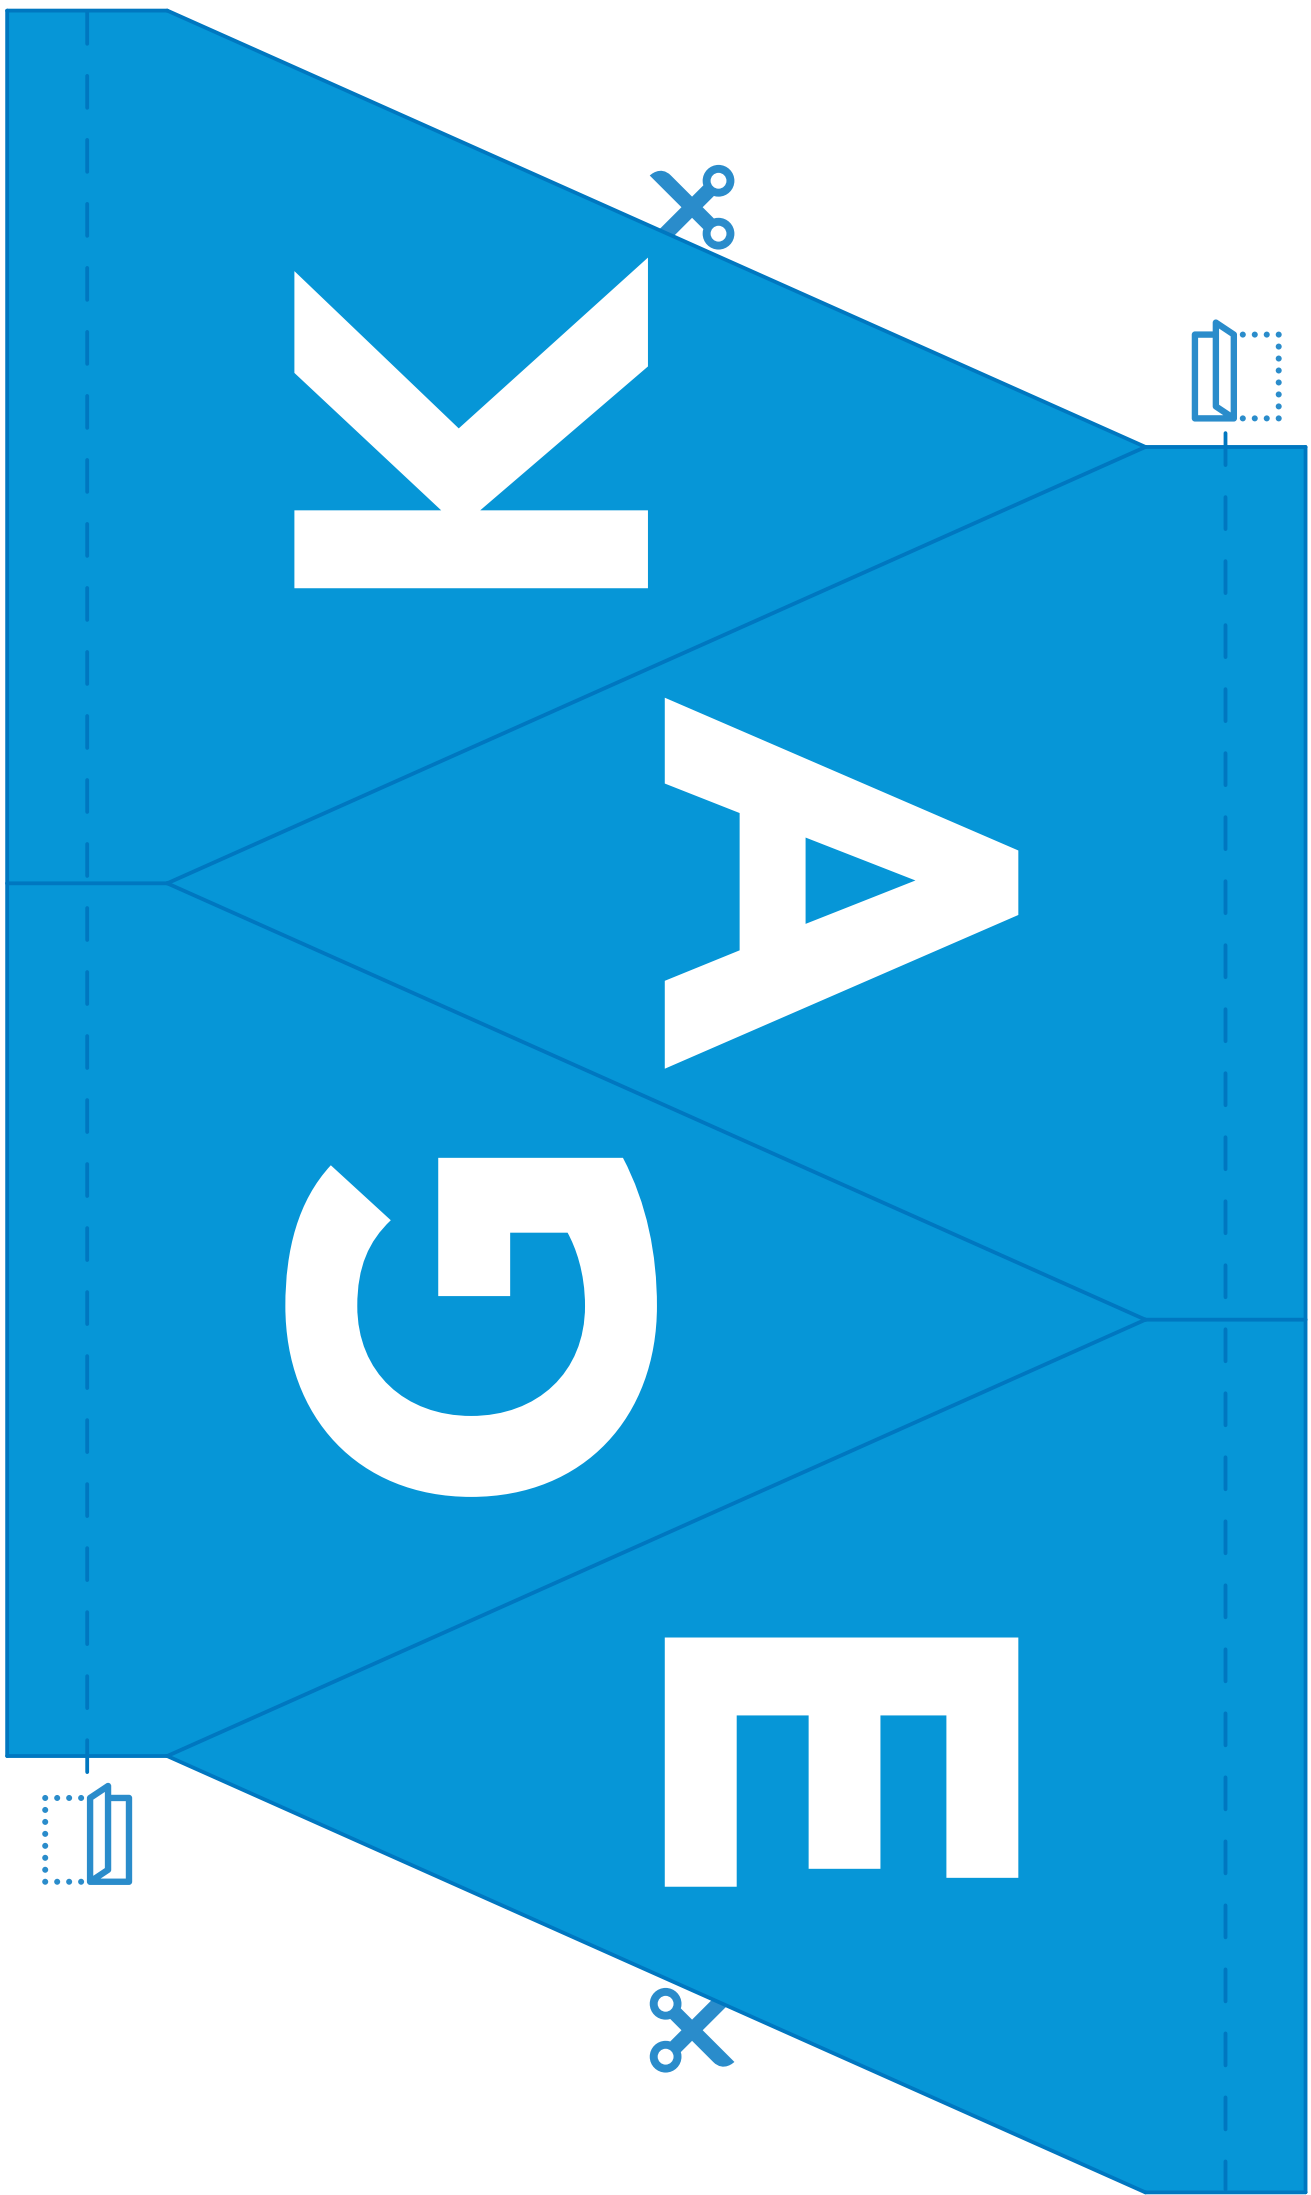

**Was arts & crafts your least favorite subject in high school? No worries, here's how it works:**

1. Print out the flags and cut them in the right shape. Preferably using scissors.
2. Grab some string. Don't have any? Use dental floss or tie your phone charger cables together. Works every time.
3. Grab some glue or tape and stick the flags onto the string.
4. Hang your flags on the wall or window.
5. High five yourself for completing this work of art.
